

Impact on Sustainable Aviation e.V. Announces Changes to Board of Directors

Frankfurt am Main (Germany), June 18th, 2024

impact on sustainable aviation e.V. ("impact"), a leading non-profit organization dedicated to advancing sustainability in the aviation industry, announces changes to its Board of Directors. These changes are set to further strengthen impact's mission and enhance its strategic direction towards promoting sustainable practices in aviation.

The following individuals have been appointed to the Board of Directors:

Michael Halaby, Managing Director, Head of Aviation Advisory at MUFG Bank, Ltd. has 20+ years of providing strategic capital raising advice to C-suite executives in the aviation; based in London his role is to help its clients raise capital, offer aviation financial consultancy services and provide advice on ESG strategies.

"I have been a firm believer in aviation taking a positive, proactive approach to decarbonisation. I also believe the sector is better off taking control of the process – as we know best – than leaving to others. I have been a strong and vocal proponent of impact since we were a founding member and am thrilled to serve on its Board.",
Michael Halaby

Bryson Monteleone, Senior Advisor at PwC Ireland has 25+ years of experience in both the corporate and commercial aviation industry, with an extensive background in aviation finance, i.a. aircraft appraisal and valuation, lease advisory, aircraft technical consulting, and aircraft remarketing. Along with his ISTAT board position, he also chairs the ISTAT Sustainability Committee.

"For over 25 years, I have been privy to the evolution of our industry from a financing perspective and witnessed our monumental strides in noise abatement, engineering efficiency and the beginning of our journey of addressing our environmental impact and sustainably driven goals towards NetZero. I am excited to supporting impact on this initiative as we aim to set the stage for the next generation.", Bryson Monteleone.

These new appointments come as impact continues to expand its efforts to influence global aviation practices towards greater environmental responsibility. The addition of these highly respected professionals is expected to significantly bolster impact's capability to drive meaningful change in the industry.

"We are thrilled to welcome Bryson and Michael to our Board of Directors," said Ulrike Ziegler, President of impact. "Their combined experience and passion for sustainability will greatly enhance our ability to promote and implement sustainable

aviation solutions worldwide. We would also like to express our deepest gratitude to the outgoing board members Philipp Goedeking, Avinomics, and Peter Smeets, 360 Asset Finance - both founding members of impact, who have contributed immensely to the organization's growth and impact. Without them both we would not be where we are today. Their dedication and service have laid a strong foundation for the incoming board to build upon. We are looking forward to continuing our work with Philipp and Peter who will remain actively involved in impact's workstreams."

impact remains committed to its mission of advancing sustainable practices in aviation through advocacy, collaboration with industry stakeholders, and research. With the new board members' expertise, impact is well-positioned to continue leading the charge towards a more sustainable aviation future.
